- △ Featured webinar (product tour) gets the vast majority of engagement
Action: Display the highest value asset in this placement, rotate regularly
- △ Buried “BigCommerce University” link gets high engagement
Action: This supports including training and video content

Background

The resource page should be a simple page on our blog, highlighting useful posts and information about specific topics we blog about. Our resource page currently doesn't display all of our updated resource information and doesn't offer excellent user flow.

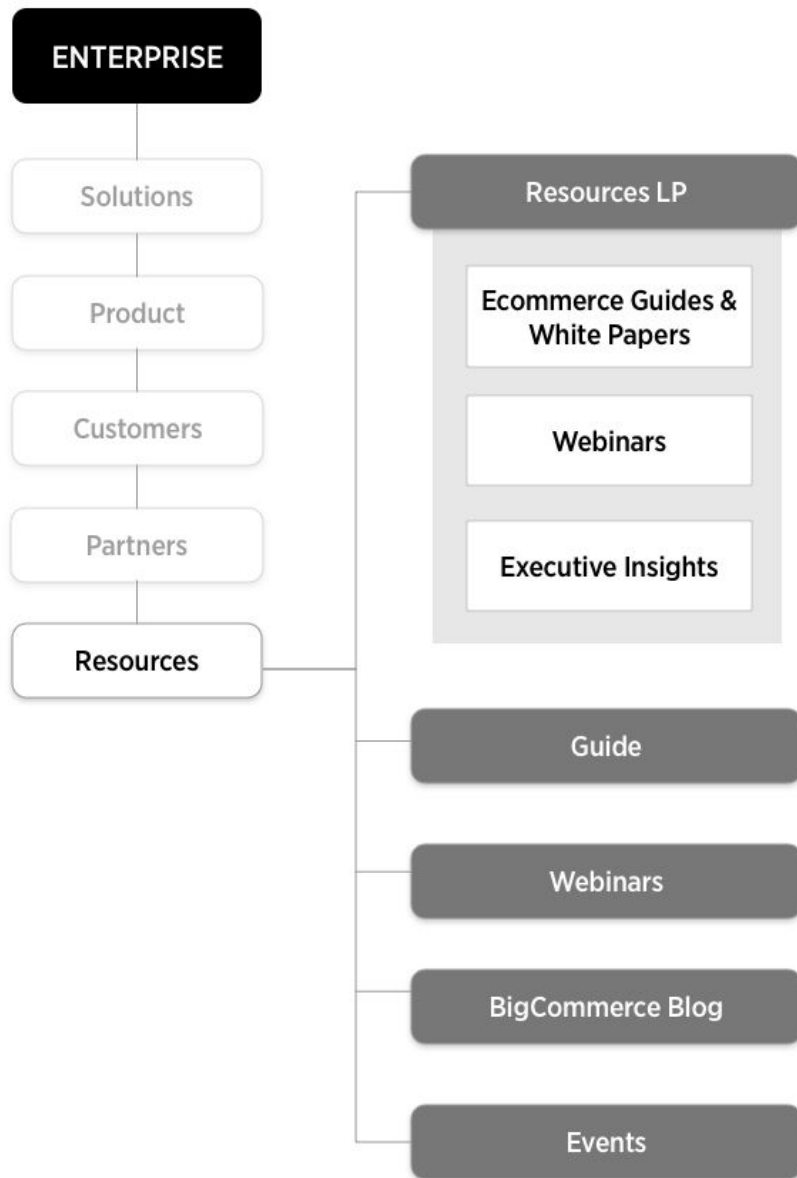

We have lots of room to create and improve the user journey. As a result, users can get the information they're looking for easily, but we can increase our CTR and support our service's best quality with improvements.

UX Goal

We need to provide a better user experience since we increased resource information and added content. Users can easily find any information through the resource hub page. We can also let users find it in multiple ways because everyone searches for things differently, so they need to accommodate this by having various user journeys. The idea is to create a go-to resource so that users can find our very best content quickly.

UX Principles

- Educate our audience
- Allow the audience to find information quickly
- Increases the stickiness of the page
- Engage audience to share our content, which then spreads our brand
- Improve our CTR rates for better organic rankings and SEO
- Help to ensure customer's business is a success by providing information for decision making

Takeaways

Shopify has a very standard resource page. It's straightforward with icons. This page has nothing that stands out, but if users drill down into the second level of the pages, there is plenty of information.

There are some things different about Shopify's resources. Most other SaaS companies include the resource CTA on the main navigation, but for some reason, Shopify doesn't.

Key Features

- Blog
- Shopify Help Center
- 24/7 Support
- eCommerce University
- Theme Store
- App Store
- Hardware Store
- Shopify Experts
- Partners

Takeaways

Magento has three categories of resources which are "For marketers," "For IT," and "For more." They are well organized, and the landing page represents most of the contents as the navigations on the dropdown menu. They provide users multiple options. Magento resource page has lots of video series compared to others.

We have "Case Studies" under "Customers", but Magento combines "Customer Success Stories" under the resources. On the Resources Library, each content tile has the indicator called "exclusive contents," so users have to fill out the form to watch the webinar. We have a similar form, but we have a different overall user experience.

Key Features

For Marketers:

- Resource Library
- Customer Success Stories
- Events

For IT:

- Tech Resources
- Magento U
- Help Center

More Resources:

- Tip & Tricks Videos
- Webinars
- Download Release & Patches

Takeaways

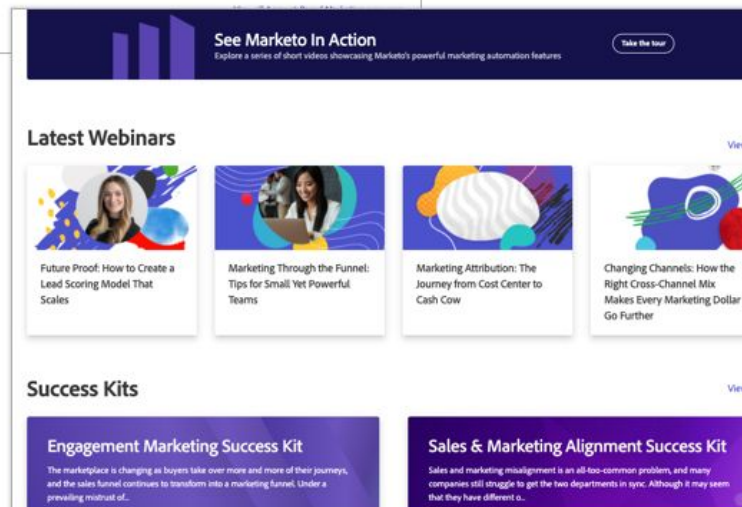

The home page quickly draws the user to key topics and important resources to keep users from feeling overwhelmed at the volume of content. Each of the key landing pages starts with big, authoritative pieces of ungated content. The secondary dropdown menu is split by topic and type, so users can quickly choose the resources that interest them.

It combines the tile layout and sidebar navigation and displays plenty of resources on the main page. It helps access what they're looking for. It's very similar to our ICP page design.

The resource center LP is very busy. It could be simplified to clarify and highlight those top issues more clearly.

Key Features

- Resource Center
- Upcoming Events
- Upcoming Webinars
- Live Demo
- Customer Community
- CMO Nation
- Marketo Blog
- Developers Blog

ORACLE <https://www.oracle.com/technical-resources/>

The screenshot displays the Oracle Technical Resources website. At the top, there is a navigation bar with links for Products, Resources, Support, and Events, along with a 'View Accounts' button. Below the navigation bar, a 'Technical Resources from Oracle' section features a grid of six category cards: Downloads, Documentation, Support, Training, Community, and More. Each card lists specific resources and includes an 'All [Category]' link. A red dashed line highlights the 'Resources' tab in the navigation bar and the corresponding content area. Below the grid is a search bar labeled 'Search Oracle.com'. The 'Featured Tech Resources' section follows, with a sub-header 'Explore resources, events, and programs to advance your expertise in Oracle Cloud applications and infrastructure.' It contains four featured resource cards with images and brief descriptions. At the bottom, a 'What's New in Oracle Technology' section is visible, showing three articles: 'Working with Oracle Cloud Infrastructure Object Storage', 'Machine Learning: Performance on Autonomous Database', and 'Data Science applications Learning'.

Takeaways

It enables users to quickly identify the type of content that they're looking for. However, it seems the dropdown sub-navigation is overloaded. Using icons can make this user-friendly even though it's not the best icon design.

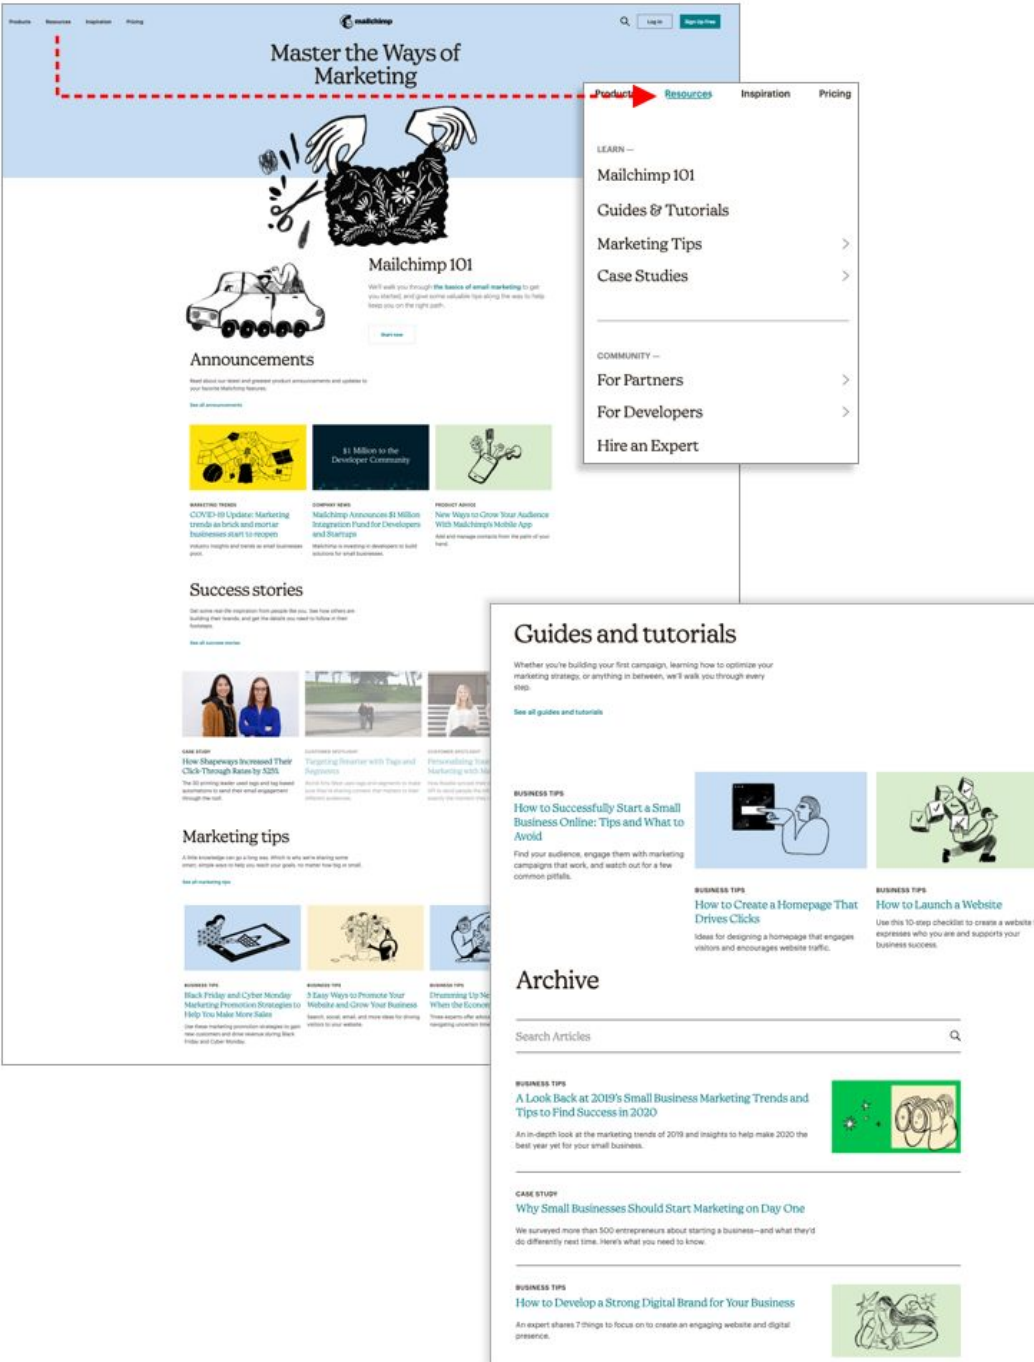

The search content is useful to find other resources, and "what's new Oracle technology" shows the most recent information as a beneficial feature. Also, using carousels is that they enable more than one piece of content to occupy the same piece of prime real estate on the page.

Key Features

- Downloads
- Documentation
- Supports
- Training
- Community
- More
- Featured Tech Resources
- What's New in Oracle Technology

This screenshot shows the Oracle navigation menu, which is a dropdown list of various resources. The menu items are organized into several groups, each with a distinct icon:

- About Oracle:** Analyst Reports, Business Practices, Corporate Responsibility, Corporate Security Practices, Customer References, Investor Relations, Oracle's response to COVID-19.
- Other Resources:** Blogs, Buy and Renew Online, Community Forums, Consulting, Documentation, Financing, Software Downloads, Support Offerings, Support Renewals.
- Oracle University:** Free Training, Digital/Online Training, Guided Learning, Certification.
- Oracle PartnerNetwork:** Log In, Find a Partner, Partner Store.
- Developer Center:** Oracle Cloud Free Tier, Free Training, Cloud Architecture, Cloud Invoicing, Cloud Marketplace, Cloud Readiness Updates, Cloud Security Practices, Oracle for Startups, For Students and Educators.

The screenshot shows the Mailchimp Resources page with several callouts highlighting key features:

- Master the Ways of Marketing:** A red dashed box highlights the main title at the top of the page.
- Resources Menu:** A callout points to the 'Resources' link in the top navigation bar.
- Mailchimp 101:** A callout points to the 'Mailchimp 101' article, which is described as a super guide for getting started.
- Guides and tutorials:** A callout points to the 'Guides and tutorials' section, which offers step-by-step guides for various marketing tasks.
- Archive:** A callout points to the 'Archive' section, which allows users to search and access previous resources.

The page content includes sections for:

- Announcements:** Recent news and product updates.
- Success stories:** Real-world examples of businesses that have succeeded using Mailchimp.
- Marketing tips:** Practical advice for improving marketing performance.
- Guides and tutorials:** Detailed instructions for various marketing tasks.
- Archive:** A searchable collection of all resources.

Takeaways

Mailchimp has clear and straightforward titles and excellent visual cues to go with their resources. They use the title, highlighted on the top of the page "Mailchimp 101," a super guide for getting started!

The archive feature allows users easy access, retaining previous resources that are still valuable for long periods.

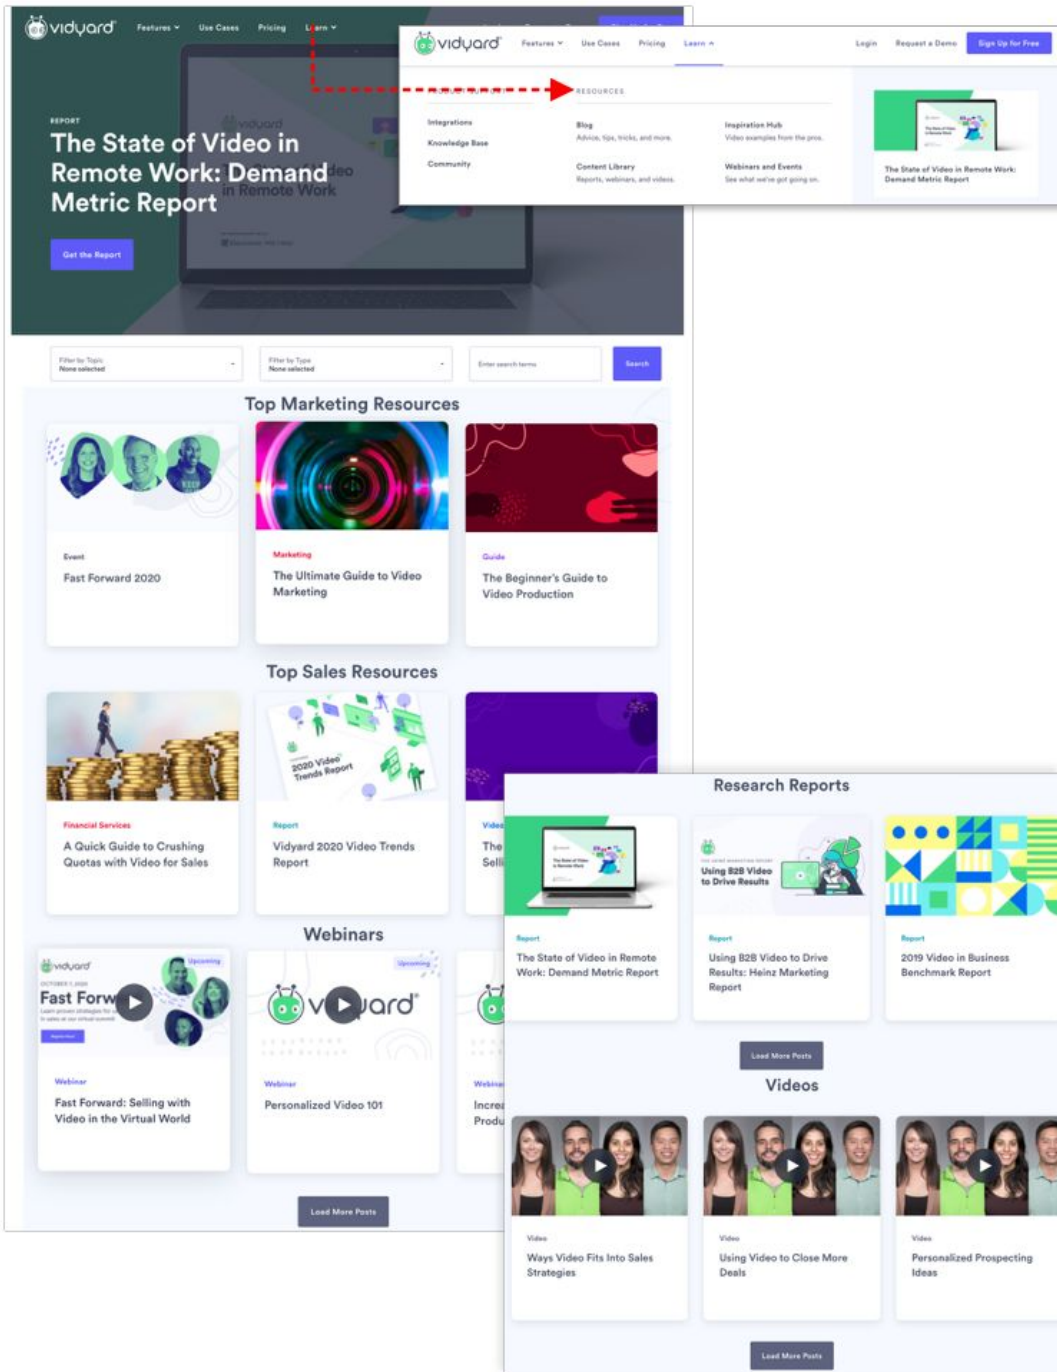

Key Features

Learn:

- Mailchimp 101
- Announcements
- Success stories
- Marketing tips
- Guides and tutorials
- Archive

Community:

- For partners
- For developers
- Hire an expert

The screenshot displays the Vidyard Resources page with a navigation menu at the top. A red dashed arrow points from the 'Learn' dropdown to the 'RESOURCES' section. The page features several filter options: 'Filter by Topic' (None selected), 'Filter by Type' (None selected), and a search bar. The content is organized into several sections:

- Top Marketing Resources:** Includes an Event 'Fast Forward 2020', a Marketing guide 'The Ultimate Guide to Video Marketing', and a Guide 'The Beginner's Guide to Video Production'.
- Top Sales Resources:** Includes a Financial Services report 'A Quick Guide to Crushing Quotas with Video for Sales', a Report 'Vidyard 2020 Video Trends Report', and a Video 'The Sell'.
- Research Reports:** Includes a Report 'Using B2B Video to Drive Results', and a Report '2019 Video in Business Benchmark Report'.
- Webinars:** Includes a Webinar 'Fast Forward: Selling with Video in the Virtual World' and a Webinar 'Personalized Video 101'.
- Videos:** Includes three video thumbnails: 'Ways Video Fits Into Sales Strategies', 'Using Video to Close More Deals', and 'Personalized Prospecting Ideas'.

Each section includes a 'Load More Posts' button. The page also features a 'RESOURCES' dropdown menu with options: Integrations, Knowledge Base, Community, Blog (Advice, tips, tricks, and more), Content Library (Reports, webinars, and videos), Inspiration Hub (Video examples from the pros), and Webinars and Events (See what we've got going on).

Takeaways

Vidyard's resource page contains filter options by "Topic," "Type," and "Terms." It makes searching in different ways flow smoothly. We have a similar filter on Case Study and Career. It can make for a better user experience. We may consider adding the filter option on the resources page as well.

Each module has "Load More" CTAs. It creates a shortcut to see additional content instead of opening another page. They combine stock photos and illustrators to ensure users can quickly identify the type of content they're looking for.

Key Features

- Blog
- Inspiration Hub
- Content Library
- Webinars and Events
- Research Reports
- Sales Resources
- Top Marketing Resources

The screenshot displays the Bynder Resources page. At the top, there is a navigation menu with links for Products, Solutions, Pricing, Customers, Resources, and Partners. A 'Book a demo' button is also visible. The main heading is 'Resources' with a sub-heading 'Explore our centralized resource center, covering everything from feature overviews to customer stories and industry insights'. Below this is a search bar and a category filter set to 'All'. The page is divided into several sections:

- Essentials for DAM:** A grid of six content cards including 'Video Brand Studio feature overview', 'DAM integrations playbook', 'Executive guide: 3 models for digital transformation', 'DAM comparison guide', 'Ultimate Guide to DAM Integrations', and 'DAM RFP for your business'.
- What our customers say:** A section featuring customer stories from Keune, Knight Frank, Siemens Healthineers, Health Insurance, Milestone, and Klarna.
- Essentials for brand management:** A grid of three content cards including 'Think locally, act globally: Localizing content with Bynder', '2020 State of Branding Report', and 'Brand growth playbook'.
- The DAM Toolkit Series:** A grid of three content cards including 'DAM integrations playbook', 'The definitive digital transformation toolkit', and 'Bynder ROI and Analytics toolkit'.

On the right side of the page, there is a 'RESOURCES' sidebar with a dropdown menu showing 'Guides', 'Blog', 'Videos', 'Webinars', 'Knowledge Base', and 'Service & Support'. Below this, there are 'FEATURED' articles such as 'Video Brand Studio feature overview', 'DAM vs. Online File Storage Solutions', 'The State of Branding Report: COVID-19 Edition', 'OnBrand', 'Digital Rights Management', and 'File Management'.

Takeaways

Bynder resources page comes with search, dropdown filter, and horizontal navigation which is inside page even though the secondary navigation is on the top. Each of these functions is convenient to find the resources quickly on the same page instead of opening another page or tap. It's a common practice to create what is called a category filter.

However, it is unclear when the user selects one category because it doesn't display any selected category indicator after clicking.

The block design is simply listed with the same visual style. It can create a go-to resource to find the very best content easily, but it needs to be more creative and visually engaging.

Key Features

- Guides
- Blog
- Videos
- Webinars
- Knowledge Base
- Service & Support
